MAXIMISE RECOVERY.

AMPED™ Recover is a post-workout drink for better muscle recovery and rebuilding.

WHY YOU NEED AMPED RECOVER:

WHAT IS AMPED RECOVER?

AMPED Recover is a postworkout drink containing branched-chain amino acids to support muscles and aid exercise recovery.

HOW IT WORKS:

AMPED Recover features a blend of branched-chain amino acids and L-carnitine to support muscle maintenance and rebuilding after exercise. Consume after exercise or combine with water and Replenish™ and sip during exercise to support muscles and reduce fatigue.

BCAAS IN ACTION:

Branched-chain amino acids (BCAAs) include leucine, isoleucine and valine. Leucine is primarily responsible for stimulating muscle protein synthesis while isoleucine and valine stimulate nutrient uptake by cells. When combined, these BCAAs provide better post-workout recovery.

Perfect for:

- Adults 18+ seeking optimal recovery
- · Athletes looking to recover faster after training

Contact your Isagenix Independent Associate for more information:

WHAT MAKES AMPED RECOVER UNIQUE?

AMPED Recover is more than just branched-chain amino acids. It also contains L-carnitine, which helps to support muscle tissue and reduce post-workout muscle fatigue. AMPED Recover can be combined with IsaPro or IsaLean™ PRO after exercise to support muscle growth and rebuilding.

The effectiveness of AMPED products depends on nutritional timing - when you take each product throughout your workout. There are three windows, pre-, mid- and postworkout, where these products are designed to help deliver results.
